Our office is well equipped with the state-of-the-art technology and world class infrastructure. Covering close to 13,000 square feet of floor area for 250+ people, with a dynamic work environment and a sustained ability to balance time with commitments we ensure that your work gets the best of everything.

## STI Services

STI offers wide array of services across multifarious domains like creative, software, engineering and professional services.

**Creative Services** - Graphic design, media development and creating a brand identity: Many claim to do it, but we succeed by doing things differently; with a touch of class and blend it with a dash of our creativity". STI has made forays into domains like Flash design & development, web design and development, brand management, e-learning, interactive media development and all types of graphics. While providing any of these services we strive to create an atmosphere so engaging that people come, stay and experience your company, products and services in the manner that you desire.

- Excellence : Quality product/services with first-rate results
- Execution : Quick turn around and collaboration with the client
- Expense/Value : Best value for clients money

Visit [www.sti-cs.com](http://www.sti-cs.com) for more information.

**Software Services** – STI Software services helps addressing client's challenges & complexities by listening to their needs & providing them with the BEST SOLUTION by a)Smooth and transparent communication b) Developing state-of-the-art applications using technologies like ASP, PHP, DOTNET, and VB.

Visit [www.stisoftware.net](http://www.stisoftware.net) for more information.

**Engineering Services** – Experience STI's dynamic engineering solutions that enable customers to foster product innovation and improve its operational efficiencies.

STI Engineering is developing very **complex engineering solutions** around the world by working on unique projects. Recently STI has completed and it is operational an Automated Parking Garage at Dubai, UAE, with seven level facilities with a capacity of storing and retrieving 765 cars. The 'Garage Manager', using GE Fanuc CIMPLICITY software, provides the core logic and is the engine that manages the operations of the garage to store and retrieve up to 765 cars and pallets. See video of actual operation in our engineering web site.
